1. Airburst	8
2. Refracted Air	11
3. Curved Air	12
4. Aphelion (the point before return)	14
5. Airglow	17

*Bushscapes* consists of works from grade 2 to a hard grade 3 in level of difficulty. The titles obviously suggest an Australian Bush scene and will be useful in interpreting the music. The right hand thumb is frequently used to play the melody so this suite may be beneficial in the development of right hand technique.

*Visions of Air* is more difficult, ranging from 4th grade to 7th grade level. The titles are abstract but do describe an imaginary plot based in science, so a little research into their meanings will be an advantage. It is the journey of a 'pocket of air', beginning with a burst and then traveling through different medium - being refracted, curved and slowed down before returning to its point of origin in a glow of energy.
